Jennifer Manongdo, PhD, recently completed her doctoral degree in Psychology from the Clinical/Community Psychology Division at the University of Illinois at Urbana-Champaign. She received her BA in Psychology, Sociology, and Social Science at the University of California, Irvine (UCI). Prior to starting her doctoral degree, she was a research associate at the UCI Medical Center working on clinical trial studies on the treatment of ADHD in children and adults. Her current program of research focuses on ethnic minority youth mental health, particularly the risk and protective factors involving family relationships and stressors associated with belonging to an ethnic minority group. The goal of her research is to inform the development and/or adaption of intervention programs for families, especially ethnic minority families. Her research has been published in the *Journal of Clinical Child and Adolescent Psychology* and will soon be published in *Cultural Diversity and Ethnic Minority Psychology.*
