Pedro L. Delgado, MD is Dielmann Distinguished Professor and Chairman of the Department of Psychiatry and Associate Dean for Faculty Development and Professionalism at the School of Medicine at the UT Health Science Center. His research is focused on discovering the causal mechanisms for mood and stress disorders and in understanding how and why medication and psychotherapeutic antidepressant treatments help depressed people recover from illness. He has published over 100 scientific articles and book chapters concerning these and related topics. A dedicated teacher, Dr. Delgado has conducted numerous courses, lectures, and seminars and provided guidance in mentoring fellows, medical students, and early career medical school faculty.
